

Table of contents

Part 1

Key Concepts on Biosphere Reserves and Designated Areas: their Special Characteristics, their Role and Value

Chapter 1

Ecological principles and function of natural ecosystems 9

1.1 Introduction – Fundamental concepts 10

1.2 Organisation and characteristics of ecosystems 10

1.3 Biogeochemical cycles 17

1.4 Biodiversity 23

1.5 Types of flora and fauna in the Mediterranean 28

1.6 Types of ecosystems in the Mediterranean 31

Chapter 2

Contemporary sustainable development issues overview 37

2.1 Introduction – Environmental problems and consequences 38

2.2 Pollution 42

2.3 Erosion, desertification, deforestation 53

2.4 Marine threats 55

2.5 Urbanisation and tourism pressures 56

2.6 Possible responses 57

Chapter 3

Biosphere Reserves (BRs) and various types of designated areas 61

3.1 Introduction – Protecting designated spaces in the past 62

3.2 Biosphere Reserves and their characteristics 62

3.3 Other types of designated areas 71

3.4 The international legal framework for designated areas 73

Chapter 4

Management of Biosphere Reserves (BRs) and various types of designated areas 77

4.1 Introduction – From environmental management to sustainable management 78

4.2 The evolution of environmental management from 1960's onwards 81

4.3 The scope for management within a Biosphere Reserve 84

4.4 Management plans 84

4.5 Fund-raising for Biosphere Reserves and other designated areas 93

4.6 The cultural dimension of designated areas 98

Part 2

Key Concepts and Methods of Education for Sustainable Development in Biosphere Reserves and other Designated Areas

Chapter 5

Key concepts in Education for Sustainable Development (ESD) 103

- 5.1 From Environmental Education (EE) to Education for Sustainable Development (ESD) 104
- 5.2 Basic principles and characteristics of ESD 109
- 5.3 Approaches to the concept "environment" in light of ESD 116
- 5.4 Research results on ESD in designated areas 119
- 5.5 Networks and collaborations supporting ESD 124

Chapter 6

The ESD programme officer in Biosphere Reserves and other designated areas 125

- 6.1 Introduction 126
- 6.2 The competences of the educator, designer, facilitator 126
- 6.3 Special knowledge and competences needed 136
- 6.4 Communication 138
- 6.5 Using games: ice-breakers and group builders 140
- 6.6 Codes of conduct and safety rules 143

Chapter 7

Planning, implementing and evaluating ESD activities within Biosphere Reserves and other designated areas 145

- 7.1 Introduction 146
- 7.2 What is to be achieved (setting objectives) 152
- 7.3 Who will be involved 154
- 7.4 Who is being addressed (target-group) 157
- 7.5 Choosing a method 159
- 7.6 Evaluation 160

Chapter 8

Current pedagogical methods and tools applied in ESD 163

- 8.1 Field visits and research 164
- 8.2 Working in groups 173
- 8.3 Conflict management within groups 176
- 8.4 Brainstorming and making charts 179
- 8.5 Concept maps 184
- 8.6 Geographical maps, graphics and other visual tools 189
- 8.7 Learning through objects 194
- 8.8 Experiments 199
- 8.9 Analogies and models 202
- 8.10 Values education within ESD 206
- 8.11 Simulation and dramatisation 220
- 8.12 Problem based learning 224
- 8.13 Participatory processes and methods for improving citizenship 228

Annexes

- Annex 1. Applied activities 232
- Annex 2. Indicative Worksheet for the Water Quality Test 245
- Annex 3. Behaviour change models 246
- Annex 4. Acronyms 249
- Bibliography 251
