Table of contents

Part 1

Key Concepts on Biosphere Reserves and Designated Areas: their Special Characteristics, their Role and Value

Chapter 1

Ecological principles and function of natural ecosystems

1.1 Introduction – Fundamental concepts
1.2 Organisation and characteristics of ecosystems
1.3 Biogeochemical cycles
1.4 Biodiversity
1.5 Types of flora and fauna in the Mediterranean
1.6 Types of ecosystems in the Mediterranean

Chapter 2

Contemporary sustainable development issues overview

2.1 Introduction – Environmental problems and consequences
2.2 Pollution
2.3 Erosion, desertification, deforestation
2.4 Marine threats
2.5 Urbanisation and tourism pressures
2.6 Possible responses

Chapter 3

Biosphere Reserves (BRs) and various types of designated areas

3.1 Introduction – Protecting designated spaces in the past
3.2 Biosphere Reserves and their characteristics
3.3 Other types of designated areas
3.4 The international legal framework for designated areas

Chapter 4

Management of Biosphere Reserves (BRs) and various types of designated areas

4.1 Introduction – From environmental management to sustainable management
4.2 The evolution of environmental management from 1960’s onwards
4.3 The scope for management within a Biosphere Reserve
4.4 Management plans
4.5 Fund-raising for Biosphere Reserves and other designated areas
4.6 The cultural dimension of designated areas
Part 2

Key Concepts and Methods of Education for Sustainable Development in Biosphere Reserves and other Designated Areas

Chapter 5

Key concepts in Education for Sustainable Development (ESD)

5.1 From Environmental Education (EE) to Education for Sustainable Development (ESD)

5.2 Basic principles and characteristics of ESD

5.3 Approaches to the concept "environment" in light of ESD

5.4 Research results on ESD in designated areas

5.5 Networks and collaborations supporting ESD

Chapter 6

The ESD programme officer in Biosphere Reserves and other designated areas

6.1 Introduction

6.2 The competences of the educator, designer, facilitator

6.3 Special knowledge and competences needed

6.4 Communication

6.5 Using games: ice-breakers and group builders

6.6 Codes of conduct and safety rules

Chapter 7

Planning, implementing and evaluating ESD activities within Biosphere Reserves and other designated areas

7.1 Introduction

7.2 What is to be achieved (setting objectives)

7.3 Who will be involved

7.4 Who is being addressed (target-group)

7.5 Choosing a method

7.6 Evaluation

Chapter 8

Current pedagogical methods and tools applied in ESD

8.1 Field visits and research

8.2 Working in groups

8.3 Conflict management within groups

8.4 Brainstorming and making charts

8.5 Concept maps

8.6 Geographical maps, graphics and other visual tools

8.7 Learning through objects

8.8 Experiments

8.9 Analogies and models

8.10 Values education within ESD

8.11 Simulation and dramatisation

8.12 Problem based learning

8.13 Participatory processes and methods for improving citizenship

Annexes

Annex 1. Applied activities

Annex 2. Indicative Worksheet for the Water Quality Test

Annex 3. Behaviour change models

Annex 4. Acronyms
