Israeli Occupation’s Detrimental Procedures on Environment

- The Dead Sea water level has severely decreased due to the excessive use of the Jordan River water (2-4m annually) / (Israeli Plans to Dry Up the Sea).
- Colonial Settlements’ Sewage in Palestinian Lands.
- Excessive Pumping of Underground Water as Israelis Control 80% of Underground Water (Springs Depletion).
- Excessive Utilization of Palestinian Natural Resources Including Water & Stone Quarries (11 Stone Crushers).
...Israeli Occupation’s Detrimental Procedures on Environment

- Trees Uprooting for Colonial Settlements’ & Colonial Racist Roads Establishment.
- Intentional Poisoning and Vandalism of Palestinian Farms by Aggressive Israeli Settlers.
- Usage of toxic gases and Chemical by Israeli Army to disburse Peaceful Palestinian Demonstrations (Detrimental Effect on Soil & Water).
- Industrial & Chemical Waste Dumped in Palestinian Occupied Territory by Israeli Factories.
- Banning Palestinian Farmers from Agricultural and Cultivation Activities (Desertification).
- Impact of the Annexation & Expansion Wall on Palestinian Environment (Hundred of Thousands of Trees were Uprooted).
- Usage of Internationally Prohibited Weapons by Israeli Army Specially in Gaza.
